

Now that **IS** Cricket!

Huge thanks go to the Friends of Newark Hospital who have purchased a 'Cricket' transfer aid to help patients with neurological problems during treatment.

Therapy Team Leader Frances Tweddle said: "We are extremely grateful to the Friends for their invaluable support in purchasing this aid.

"Patients with complex needs, such as stroke survivors, Parkinson's Disease and Multiple Sclerosis, can now be transferred with ease. It also helps to improve their treatment, making it easier for them to regain their independence."

The Friends presented the aid, which cost over £800, to the Therapy team in June.
